About

A highly motivated and enthusiastic Computer Applications undergraduate seeking an entry—level opportunity to apply technical knowledge and creative problem—solving in a dynamic work environment. Passionate about learning new technologies, building user—focused solutions, and contributing effectively to team—based projects.

Experience

Academic Project

Role : Designer & Developer

Developed a student-staff collaboration platform aimed at assisting students with academic projects.

Enabled users to send project requests, receive proposals with payment and deadlines, and review staff profiles and ratings.

Designed with user—friendly interfaces and database integration for efficient data handling.
